

Unfortunately, sign-ups for the town hall have ended to prepare to call out to all those who RSVP'ed. I apologize for any inconvenience this may cause.

On **Thursday, June 16th at noon PDT**, I will be hosting another telephone town hall; the subject this time will be how the proposed changes to Medicare and the Republican Budget will affect older Americans. With so much happening in Congress over the past few months, many of you have asked important questions about how what is being proposed in Washington will affect the critical services you have come to count on. Considering the effect that this year's budget will have in setting our country's priorities for years to come, I believe it is very important to have this discussion.

This month's telephone town hall will be accomplished by calling out to constituents on their telephones 10 minutes before the event, and encouraging them to listen in on the important discussion. Constituents can ask questions at any time, and make their voice heard.

Please note: I am regrettably only able to call, and take questions from constituents of California's 15 th District. You must have a verifiable address, zip-code, and telephone area code from the district to guarantee your involvement in the town hall.
